WARRANTY AND DISCLAIMERS

Tech Team Products, Inc. guarantees that its products are free from defects in material and workmanship for a period of 90 days from the original date of purchase. For electronic items (anything that requires a battery), the warranty period is also 90 days. This Warranty applies to non-commercial use only. Commercial use voids this warranty. In the event of any defects in material or workmanship, Tech Team Products, Inc.'s sole liability therefore shall be the replacement of any such product(s) and/or components that are defective in material or workmanship. The replacement of any such product(s) and/or components shall be Tech Team Products, Inc.'s sole responsibility. This warranty specifically excludes any and all consequential or accidental damages. No other warranties or liabilities whatsoever are either expressed or implied. If any such warranties shall be imposed by law, notwithstanding this provision, then such warranties shall be the responsibility of Tech Team Products, Inc.'s reseller if applicable. There shall be no warranties of merchantability, use of trade, or fitness for a particular purpose. Alteration of any product, misuse, or exceeding any stated product limitations voids this warranty. It should be obvious when using some of these products that approved protective safety gear, including, but not limited to, eye and ear protection, should be utilized. Using the appropriate safety gear is the sole responsibility of the person(s) using the product. It should also be obvious that certain products must not be consumed, inhaled, or taken internally. The user takes full responsibility for inappropriate or incorrect use of these items. Accessories used in many of our product pictures are props to illustrate how the products are used. As such, they are not included with any product. All photographs, drawings, copy, instructions, etc. are the exclusive property of Tech Team Products, Inc. All downloadable files are intended for the use of the end user of Tech Team Products, Inc.'s products and cannot be reproduced without the express written permission of Tech Team Products, Inc.'s 2019

KAYAK ~ SUP PADDLEBOARD VERTICAL RACK

The Tech Team® Vertical Wall Rack for Kayaks, Paddle Boards, and SUP's has been designed to allow you to store your boat in a vertical position and then secure it in place. The rack has been made wide enough to accommodate multiple SUP's or 2 kayaks. Another Tech Team® high quality product made from powder coated welded steel.

In the course of shipping and packing, parts may end up missing or damaged-
Call us at 631.673.5975. 8:30 a.m. - 5:00 p.m. Eastern Time. We will promptly send replacements.

Once again, Tech Team brings you a great kayak, SUP, and paddle board storage option. The rack is designed to contain multiple SUP's or paddle boards, and one or two kayaks in a vertical orientation. All Tech Team's other kayak storage racks are designed for horizontal, overhead or against the wall installation. Sometimes you have limited horizontal wall space, but enough vertical space to make vertical storage an option. This is where the 774 Vertical Rack and Organizer comes into play. Since storing a boat in this rack does not involve lifting the entire boat and hefting it onto support members, one person need only be able to set one end in place, and then gradually elevate the balance of the boat and lash it into place. The rack is constructed from heavy duty welded steel with a powder coat finish and is designed to provide useful service for many years. In most residential construction, the studs inside the wall (these are the vertical members to which the drywall is anchored) are 2 x 4 or 2 x 6 pieces of lumber with a vertical orientation. Each one of these is 1.5" wide. Since the 774 rack is not supporting any weight, it is appropriate to anchor the sections of the rack to the studs. In order to make this process easier the mounting holes have been set on exact 16" centers so they will align with the wall studs. Installation is a very simple process.

All pictures are representative.

Thread the threaded rods into the member with the threaded holes. You can select any of the holes that will be appropriate for the width of your boat. Once you've threaded the rods in, put it over the boat to see where it fits best, and then measure from the bottom end of the boat to the rack, and this will be the height that you anchor this particular member.

In this particular case the rack was 68" from the end of the boat and we are mounting this at 68" above the floor.

Secure one end of the rack with one screw, and then use a level to determine exactly what height the other screw should be. The process works extremely well and negates the necessity of measuring and the racks always come out level.

This is how the level and mounted rack will appear.

After you have mounted the upper rack, mount the lower rack 3-4' lower using exactly the same process with the level. Based on your preference and circumstances you may elect to put the rack that we're showing on the top in the lower position and vice versa.

This is how the straps attach to the rack with the PTO Clips.

If you don't want the end of your boat to press against the pavement or the floor. You should use some type of a pad. Here we are using an old seat cushion however, a door mat or something similar would also be appropriate.

This shows how the straps engage the D rings to secure the boat in place.
